Modular Display System

The World’s Most Versatile

Designed & Manufactured In The UK
One Connector
Endless Possibilities
Introduction

Modular

Manufactured in the UK for over ten years, T3 is the world's most innovative, easy to build, compact and flexible modular display system. With no tools required or levers to push, no other system can compete on speed of build or versatility. The T3 range has been designed to be adaptable to a wide variety of display environments; exhibition stands, point of sale, conference sets, mobile bars, counters, light boxes, photobooths and hanging banners. The possibilities are endless.

T3 is able to carry all types of media including rigid, roll-able panels, tension fabrics and textiles. 60” screens, projector screens, shelving and display cabinets can all be easily incorporated.

How T3 Works

The key components consist of an aluminium beam and a connector which join together with a brilliantly simple patented, twist & lock action. All components are fire rated and require no tools or levers.

T3 Airframe - Rigid or roll-able graphic substrates such as foamboard, ACM and acrylic can all be applied using 25mm magnetic tape. Structures can be built up to 6m high.

T3 Fabframe - Tensioned fabric graphics or textiles are applied using our T3 comb. These can be backlit to create light-walls which again can be built to 6m high.

All T3 systems are completely interchangeable, re-configurable and can be used time and time again.

‘Twist & Lock’
It’s That Simple...

All T3 systems are completely interchangeable, re-configurable and can be used time and time again.
No Tools Required

T3 is a simple twist & lock action - no locks to fail, no beams to line up, no levers to push.

'We challenge any system to beat T3 for speed of build and dismantling'.

Quick & Simple To Build

Structures can be prebuilt and adjusted without extensive redesign.

Maximise Budget

A single stand can be re-configured and re-used to suit your whole exhibition programme.

Reconfigurable

All our beams can be used in the vertical and horizontal configurations giving maximum versatility.

Maximise Return

Spend time developing ideas with your client, not learning the system!

UK Designed & Manufactured

Any standard beam can be supplied within 24 hrs. All quotes and drawings guaranteed within 24 hrs.

Reduce Labour Costs

No need for skilled labour, structures can be built in minutes not hours.

Reduce Shipping & Storage Costs

T3 packs down smaller than most systems, certain stands can be transported in the back of a car.

T3 Airframe is a unique modular display system, designed to provide easy display solutions in a variety of settings. Whether you require a small starter display or a large-scale project, T3 Airframe forms the building blocks for a solution that can grow with your needs.

Seamless, T3 Airframe enables any rigid or roll-able substrate to be fixed to the system, such as Foam boards, Correx, Acrylics, PVC, Aluminium Composites and many more. Quick and easy, T3 Airframe will save you money; Self-build friendly there is no need for skilled labour or specialist transport. Extremely compact and easy to store, T3 Airframe reduces the need for storage with even large stands fitting into the back of a car.

Elegantly simple, T3 Fabframe has been designed to carry printed fabrics or textile graphics and works around the same-patented connector. Strong and completely re-configurable, the system enables interchangeable panels to be fitted quickly and easily with no tools required, offering unrivalled flexibility and speed of build.

Rear illumination is also easily achieved with T3 Fabframe, so large light-boxes and backdrops can be simply and cost effectively built and re-used.

T3 Fabframe takes full advantage of the developments made in fabric printing technology. The many benefits for using large format fabric graphics including; excellent print quality, ease of transport, durable and of course lightweight and washable.

T3 Shell-Kit has been designed with budget in mind. By using a specially designed clamp, shell scheme spaces can be converted and clad to create seamless yet professional display environments.

By utilising the T3 clamp, T3 can be fixed directly to any shell scheme throughout the world without the need for tools, saving you time and money. This framework is then clad with a roll-able, rigid or fabric graphic. Incredibly compact, T3 Shell-kit sits just 60mm away from the shell scheme wall, maximizing your floor space. Uniquely designed, T3 Shell-kit can be broken down into manageable lengths for ease of transport, with the average 3x3 shell scheme stand fitting in a bag over your shoulder.

“Using T3 has considerably reduced our shipping budget, and we have saved money at US shows where we are obliged to use Union labour - the simplicity of the system means we are up and running much faster than more traditional stand build methods.”

Kevin Emmott
CALREC

“Having used various exhibition systems over the years I can honestly say that the T3 system is the best by a long way. It is easy to transport, easy to put together and looks fantastic, with the added bonus that we can reconfigure and add to it in the future to suit different locations.”
